## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent No. 5,699,798 to Hochman et al.

Regarding Claim 1, Hochman teaches an imaging apparatus, comprising: a light source device; an image pickup device for converting a living body observed image to video signals by using light irradiated from the light source device for observation (Col. 9 lines 49-51); and a processor for generating a living body image from the video signals, wherein the processor has means for generating a living body image having at least a scattering feature of a living body tissue as image information (Col. 10 lines 43-55).

Regarding Claim 2, Hochman teaches that the image pickup device is an endoscope (Col. 11 lines 1-4).

Regarding Claims 3 and 4, Hochman teaches that the light source has many wavebands and includes the blue spectrum of 450-500 nm (Col.11 lines 30-40).

Regarding Claim 5, 15, and 16, Hochman teaches that the processor has means for estimating, from at least one living body image, spectrums corresponding to positions and/or an area in the image (Col. 4 lines 25-30 and Col. 10 lines 18-22).

Regarding Claim 6-10, Hochman teaches means for estimating a scattering feature by a living body tissue from spectrums corresponding to positions and/or areas in an image (Col. 14 lines 16 through Col. 15 line 68).

Regarding Claims 11-13, Hochman teaches that the processor has means for generating a color image having a scattering feature by a living body tissue as image information (Col. 15 lines 50-55).

Regarding Claim 14, Hochman teaches that the means for generating a color image generates an image and performs display control such that a scattering feature image and the other images can be displayed simultaneously and/or in a switching manner (Col. 15 lines 50-55).

Regarding Claim 17 and 18, Hochman teaches that the processor has means for performing at least one spatial frequency filtering (Col. 15 lines 50-55).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SANJAY CATTUNGAL whose telephone number is (571)272-1306. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on (571) 272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
